

Technical Consultant Role

JPO Solutions a leading UK Infor Technical Partner specialising in Infor CloudSuite Industrial (SyteLine), Infor M3, InforOS, Infor Factory Track and Infor Mongoose are currently looking for an Infor Syteline Technical Consultant to further bolster our growing managed service team.

THE ROLE

You will be experienced in CloudSuite Industrial (CSI), eager for new challenges and ready to help JPO continue its successful growth. The role is for a full time, permanent basis Technical Consultant assisting our customer base your key responsibilities will be:

- Working with customers to specify, design and deliver technical solutions.
- Development of personalisation's and customisation's to Infor products with the primary focus on Infor CloudSuite Industrial.
- Specification and delivery of customer reporting requirements using Infor Mongoose reports, data views and Infor Document Management (IDM).
- Assisting customers with upgrading their CloudSuite Industrial developments whether upgrading to newer CSI versions or migrating to the Infor Cloud.
- Delivering workflows, integration and process automation projects utilising InforOS and the ION platform.

Reporting to the Technical Solutions Architect you will primarily be a remote (home) worker with some travel occasionally required.

QUALIFICATIONS

- A degree in computer science or equivalent experience.
- 2+ years of hands-on experience, working with ERP systems.
- Great communication skills.
- Professional attitude.
- A desire to remain up to date with the latest technologies.
- Infor Certification not necessary but beneficial.

DESIRABLE

One or more of the following would be beneficial.

- Professional customer facing delivery or consulting experience.
- Migrating, upgrading, and supporting different CloudSuite versions and experience in migrating to the Infor Cloud environment.
- Infor CloudSuite Industrial Functional area knowledge
- Understanding and proven experience of Infor Mongoose Development including reporting.
- Fundamental understanding and experience in MS SQL Server development for creating Stored Procedure, Triggers and Functions.
- Appreciation of the design and development of IDOs, Extension Classes and Custom Assemblies in CSI.
- Development experience in a C# or vb.net.
- Experience of delivering projects utilising InforOS.

FURTHER INFORMATION

Unfortunately, due to the business nature of some of our customers this position is currently only open to UK residents. Salary based on experience. For further information on this and other opportunities at JPO Solutions please contact careers@jposolutions.com.
